

NAM750 Aero-Handler

Aircraft Wheel Lift

SPECIFICATIONS

Capacity

1500 lbs

Height

36 in

Width

33 in

Weight

150 lbs

Material

Powder-coated steel

Wheel Size

10 in diameter

The Maroon Aerospace Aircraft Wheel & Brake Lift is a lightweight mobile ground support equipment (GSE) solution designed to improve safety, efficiency, and control during aircraft wheel and brake maintenance operations. Developed by an experienced aircraft mechanic, the lift helps reduce manual handling requirements while supporting safer and more efficient maintenance procedures.

KEY FEATURES

- ✓ Lightweight & Mobile Design
- ✓ Reduces Manual Lifting & Physical Strain
- ✓ Improves Technicians Safety & Ergonomics
- ✓ Easy Removal of Aircraft Wheels & Brake Drums
- ✓ Mechanic-Engineered By Aircraft Mechanics
- ✓ Low Maintenance Requirements
